Japan International Aerospace Exhibition 2016 (JA2016) is an attractive stage to meet worldwide customers and buyers.

JA2016 develops advanced relationships of the exhibitors with Japanese industry and government.

JA2016 is the best opportunity to access the latest activities and technologies in aerospace and defense and to meet with decision makers of companies and government policy makers.

Top Class International Aerospace Trade Show

The Japan International Aerospace Exhibition has the longest history of any aerospace exhibition in Japan. The first JA was held in 1966 and JA2016 will be the 14th event. This exhibition is hosted through collaboration with Tokyo Big Sight and it promises to become most attractive time yet. JA2016 is among the most important business tools to access a market with enormous potential. Additionally, the network through Japan brings further value to your participation.

Products and Services on Exhibit

The international platform is presented for buyers, service providers and suppliers in PRODUCT AND SERVICES

- Airframe, Aircraft engines, Launch Vehicles and Satellite manufacturing
- Sub-system and Component manufacturing, Materials and Semi-finished products
- Production engineering and Process technology
- Engineering, Qualification Documentation, Test equipment, Calibration and Quality assurance
- Maintenance, Surface treatment, Environment, Logistics and Security
- Instrumentation, Electricity, Software, and Simulations
- Maintenance, Repair and Overhaul, Inspection, Services Parts, Fuel, Machine tools, and Modification and Tooling
- Transportation, Airport Managements, and Airline support services, Launch Vehicle Launching Service, Satellites Operation, Broadcasting and Communications services, Remote sensing, Navigation, and Utilization of space environments
- Research and Development, Education, Training, and Government – Industry – Academia Relationships

JA2016 – Business Opportunities

JA2016 offers many opportunities for members of the worldwide aerospace and defense industry to show their presence in exhibition and business matching and to expand their future activities.

JA2016 is a highly focused and effective platform to access recent trends, advanced technologies and new products in the aerospace industry. This exhibition facilitates communication between companies in broader aerospace markets.

JA2016 presents seminars by inviting major companies which provide a great deal of information regarding their procurement policy and their supply chain.

JA2016 offers opportunities for local industry, industrial clusters, venture companies, universities and research institutes to participate in global business with their innovative products.

JA2016 cooperates with major international conferences and seminars in conjunction with many related workshops for experts.

JA2016 gives opportunities to access the newest information about the Japanese government's defense policy and further possibilities in cooperation with Japan's aerospace.

JA2016 offers the services and the systems which make most effective use of the B to B meeting between buyers and suppliers for exhibitors.

JA2016 is held in Tokyo which is the best place to access Japanese government offices, headquarters of companies, universities and research institutes.

Japanese Aerospace Industry and Market

Japan is the largest aerospace industrial market in Asia. Starting with licensed production of defense aircraft, satellites and launch vehicles, the Japanese aerospace industry has built its own capabilities in indigenous development.

H-IIA and IIB

Japan is placed as a potential market for the global aircraft industries.

Although the Japanese aerospace industry is still relatively small compared with the automobile, home electronic and computer industries, it shows a huge potential to grow in the near future as a qualified partner in the global aerospace industry.

Japan's Defense and Security

On April 1, 2014, the Japanese government adopted new principles and guidelines on arms exports, suggesting that Japan will play a more active role in global security.

The new principles and guidelines facilitate Japan's cooperative development and production of defense related equipment with the United States and other close allies, such as the members of the NATO.

International cooperation in defense is a very important and urgent issue in Japan. JA2016 is an unique international trade show focusing on aerospace defence and security policy development in Japan.

Venue & After the Convention

Tokyo Big Sight : Opening the New Door of Global Business

Tokyo Big Sight is Japan's largest exhibition complex, located in the heart of Tokyo, and is capable of providing the most effective venue for exhibitions and conventions in Japan.

JA2016 is planned to be exhibited in the West Exhibition Hall consisting of a two-layered hall surrounding the Atrium, which is a dynamic high-ceiling space.

Enjoy Tokyo & Enjoy Japan

There are traditional arts to be experienced in Tokyo such as Kabuki, Noh and the national sport of Sumo. There is also a food culture that allows visitors to enjoy not only Japanese cuisine but also high-level cuisine of all countries.

New Tokyo culture which is found in the neighborhoods of Roppongi and Akihabara is attracting attention throughout the world.

Around the Tokyo area, you can easily enjoy one-day or overnight.
