

Shifting the technology of companies in the prefecture to microsatellites

Micro-Satellite

Large-capacity communication, long life, and debris countermeasures

Communication Technology	Maximum communication capacity : More than four times the current level (※) Ant Gain(MAX) : $\geq 20\text{dBi}$ ※Towards the ground station
Position Control System	Three-axis control of the satellite's position to point to the ground station Angular momentum(MAX) : 36.2mNm 3~12U (MAX30kg)
Propulsion System	Long life : ≥ 2 years Hall thruster thrust 5mN 3~12U (MAX30kg)

Three or more units can be equipped with analytical cameras,etc.

Large-capacity communication

<Cooperating Companies>

SHIRATO PRINTED CIRCUIT BOARD Co.,Ltd.

「Antenna Board Fabrication」

ShibaSoku Co.,Ltd.

「Antenna Communication Evaluation」

KIKUCHI SEIKI CO.,Ltd.

「Satellite Structure Fabrication」

YAMANOI SEIKI Co.,Ltd

「Satellite Structure Fabrication」

<Cooperating Companies>

STAR ENGINEERING Co.,Ltd.

「Small Motor Fabrication」

KIKUCHI SEIKI CO.,Ltd.

「Satellite Structure Fabrication」

Long life and debris countermeasures

<Cooperating Companies>

STAR ENGINEERING Co.,Ltd.

「Coil Fabrication」

OHTSUKA CERAMICS INC.

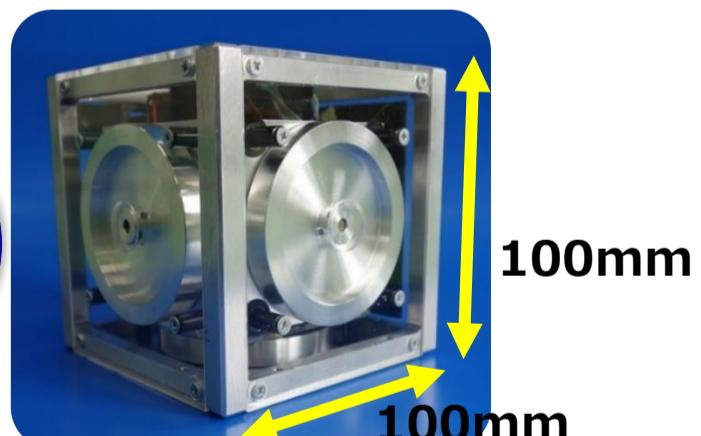

「Insulator Fabrication」

University of Tsukuba

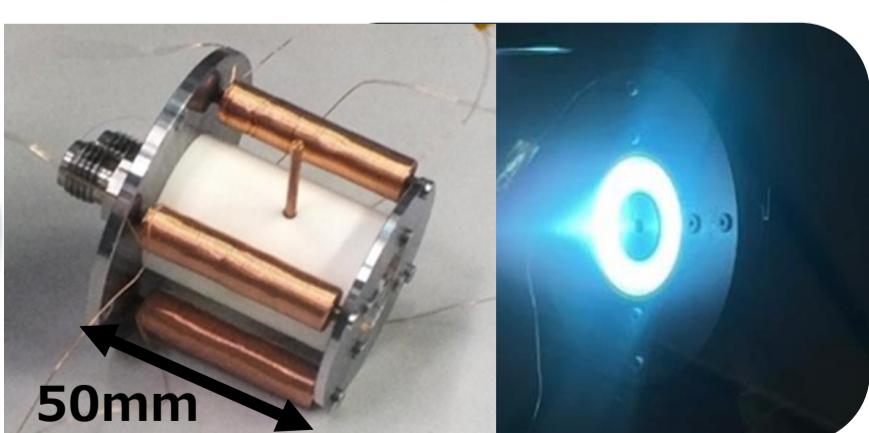

「Design & Evaluation」

Laminated Patch Array Antenna

Reaction Wheel

Small electric propulsion system
