

## WHO WE ARE

Nestled in the suburbs of Los Angeles, California, Fusion climb has been a leading brand in the design and manufacture of cutting-edge gear and equipment. For over 22 years, Fusion climb has led the field in innovative designs in both industrial and military grade products for various clients ranging from Special Operations Forces to the Industrial construction and NASA.

## WHY WE ARE UNIQUE

With 22 years in the industry, Fusion designs and manufactures the nation's top most quality fall protection equipment and outdoor adventure gear around. We not only meet but exceed UIAA, CE, ANSI safety standards, while providing consumers affordable and durable gear. With speedy delivery times and knowledgeable staff, you won't want to go anywhere else. "Safety 1st" is our motto.

## OUR SERVICE CATEGORIES

### Fall protection

Harness  
Lanyard  
Hardware  
Rigging  
PPE  
3rd party Training for high angle work  
Industrial clothing and accessories

### Rescue

Harness  
Lanyard  
Hardware  
Rigging  
PPE  
3rd party Training for high angle work  
Rescue equipment

### Law enforcement/ military

Belt systems  
Gun slings  
Rappel / Extraction system  
Rescue systems  
K9 equipment and K9 rehab gears  
Combat Medical gears  
Armor Shield Systems  
Explosion-proof and bulletproof system

### Sports and outdoor

Harness  
Lanyard  
Hardware  
Rigging  
Bags and packs  
safety equipment

## PROFESSIONAL MANUFACTURING

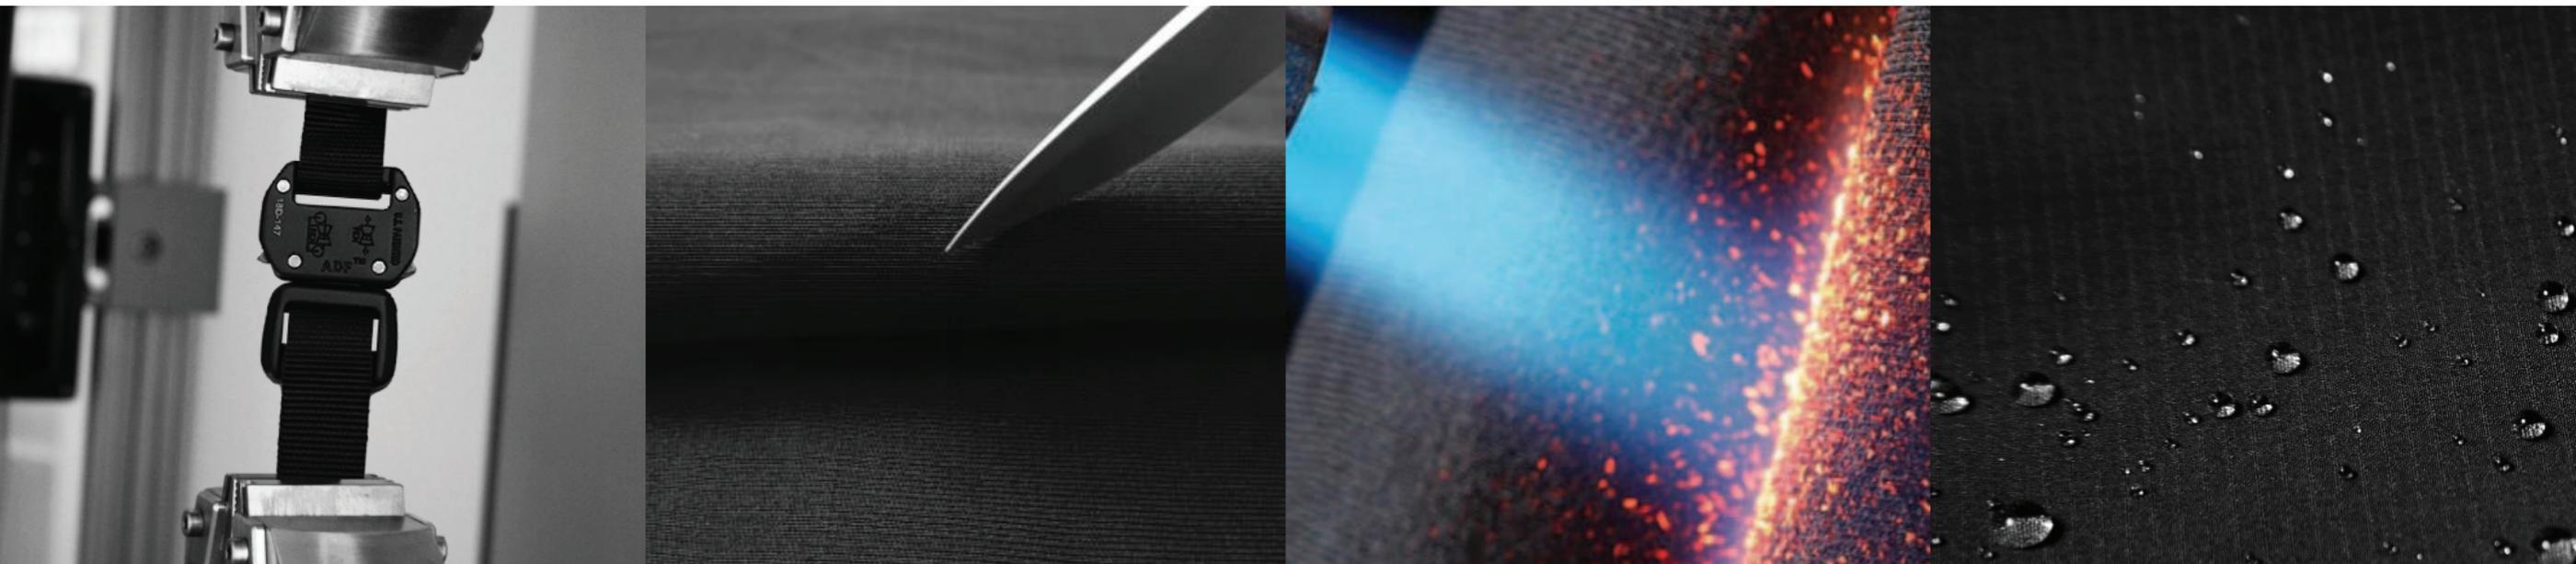

Fusion climb specialize in design, cut and sew manufacturing for safety and fall protection industries right here in Southern California.

At our Chino, location we possess a group of highly skilled and qualified manufacturing personnel, that utilizes lean manufacturing techniques to ensure quality of product manufactured and rapid delivery to our clients. Fusion determined to set the standard for custom tailored solutions for clients who demand the best product available.

Fusion climb and its partners utilize ISO 9001 quality management and ISO 14001 environmental management systems to ensure we deliver top quality products utilizing stringent standards.

## STRICT PRODUCT INSPECTION / MATERIALS RESEARCH

Our comprehensive inspection program includes Start with base material s inspection like thread, webbing, and textiles inspection, to stitching, hardware parts, and pattern of stitching. We observe and pay attention to ergonomics, form, fit, and function or a finished product.

## FIELD AND LABORATORY TESTED HARDWARE AND MATERIALS

All hardware and stitching are tested regularly through a 3rd party lab to ensure quality and consistency of its claimed strength.

## CERTIFICATIONS & STANDARDS

UNITED STATES

American National Standards

Governing institute for industrial safety and standards across multiple industries.

EUROPE

International Climbing and Mountaineering Federation

Founded in 1932. The UIAA represents the interests of over three million climbers and mountaineers from member federations on all six continents.

EUROPE

European Conformity

CE marking is a certification mark that indicates conformity with health, safety, and environmental protection standards for products sold within the European Economic Area (EEA).

## EVACUATION SYSTEM DEVELOPMENT

## EVACUATION SYSTEM DEVELOPMENT

At Space Launch Complex 41 of Florida's Cape Canaveral Air Force Station, engineers test the Emergency Egress System - a zip line escape system - that will be available for astronauts riding on Boeing's CST-100 Starliner spacecraft and United Launch Alliance Atlas V rockets.

COLORADO SPRINGS, Colo. — United Launch Alliance (ULA) has installed a 1,350-foot-long (410 meters) zip line on its Atlas V launchpad in Florida. Rather than joyrides, the zip line is intended to give astronauts a superfast way to escape during a launchpad emergency. The system is similar to the slide-wire baskets NASA once used for space shuttle crews.

- 3** Ergonomically designed 3 point adjustable harness with 2 D-rings, harness designed to perform Self-Rescue Maneuvers (Required by the New standard).
- 4** Storage bag

# CONSTRUCTION

H-TB-205AP-MAX

One of our premiere harnesses the TB-205A-MAX or "Maximus" has everything the daily fall protection harness user could ask for. The high visibility X-Pad located on the shoulders and back provides superior comfort and visibility. Presto™ quick-release steel buckles connect the webbing at the chest/ legs making putting on and taking off the harness easy and convenient. For even more comfort, the legs also have padding, like the X-PAD found on the shoulders, the foam is surrounded by mesh to assist in dissipating heat in high temperature environments. Madaco Fall Protection Harnesses meet or exceed all applicable industrial standards including OSHA and ANSI Z359.1
